Thermal Process Controllers

MADE IN THE **USA**

TUTCO Farnam offers all-in-one Thermal Process Controllers that include the heater, a state-of-the-art digital controller, flow switch, and solid-state relay, all conveniently packaged in a wall-mountable steel enclosure. These very unique product takes the guesswork out of process heating applications which require a moderate amount of wattage and have 120V or 240V power available. These heaters are capable of airflows up to 25 SCFM and up to 120 PSIG. Maximum output temperature is 260°C (500°F) depending upon airflow.
