Temperature Controllers

MADE IN THE USA

To optimize the performance of an existing resistance heater or a TUTCO Farnam air heater, we highly recommend incorporating one of our advanced control solutions. Our temperature controllers are specifically designed to provide precise, reliable, and efficient control, ensuring your heater operates at peak performance. With user-friendly interfaces and robust features, our controllers make it easy to achieve accurate temperature management, whether you're fine-tuning a process or maintaining stable conditions in demanding applications.

Visit the pages of the products below for more information.

OLC-15A Temperature Controller

The TUTCO Farnam One Loop Controller (OLC-15A) is a compact, pre-engineered temperature control panel designed specifically for TUTCO Farnam process air heaters. Replaces the Control Cube.
